Exclusive Australian distributors of DVP Technology since 1999

VFD Eco Suction – New in 2017

In 2017, VACUUM SOLUTIONS AUSTRALIA will be launching the new generation
VFD ECO SUCTION

Utilising the latest Variable Frequency Drive technology along with
the latest PLC and Touch Screens.

VACUUM SOLUTIONS AUSTRALIA is a fully Australian owned and operated company totally focussed on supplying first class medical suction equipment in compliance with world health standards.

The VSA Medical & Laboratory suction systems were developed to provide simple trouble free service for Medical Hospitals, Day Procedure Centres, Dental Clinics and Teaching Facilities. They comply fully with Australian standards.

The key to success for VACUUM SOLUTIONS AUSTRALIA has been the simplicity of the product's design, in particular the 'smart' PLC operating program, and the co-operative attitude by all staff in providing quality customer service. This latest innovation continues this tradition.

VACUUM SOLUTIONS AUSTRALIA has been supported by DVP Vacuum Technology since 1999 who now offer both traditional oil lubricated vacuum pumps as well as their new generation rotary claw vacuum pumps.
